MASHES ALL YOUR TRASH

NEW

Never-before appliance that reduces your trash problems to practically nothing!

Whirlpool

TRASH MASHER*

COMPACTOR

Compacts a week's worth of trash

into a neat little bag

America's newest appliance idea from Whirlpool Corporation — just in time to fight pollution on the home front. Takes little space and so easy to use. Everytime you toss cans, bones, bottles or paper trash into the drawer just close it push a button and the trash is compacted to 1/4 its size. It takes the equivalent of three 20-gallon cans of trash to fill it. (That's as much junk as the average family tosses away each week.) A key lock keeps kids from tinkering with it. A chemical deodorizer sprays each load of trash or garbage when you close the drawer to help control odors. The bag can be taped so litter won't blow. No lid for dogs to pry off. Let it rain or snow — plastic-lined bag is weatherproof.

Lovely China

Housewives in an area from Poughkeepsie, New York to the Capital District and surrounding areas will have an opportunity to acquire fine quality sets of imported translucent china at extremely low prices during a special promotion that began on Monday, March 1, in all Grand Union Supermarkets and Grand Way Food Stores.

Translucent china is considered the finest dinnerware available because of its beauty, strength, resistance to chipping and the fact that it will neither stain nor "craze."

The china will be offered in two new graceful patterns and designs, Moon Mist and Bell Flower. The patterns have been especially chosen to add beauty to any table setting and to fit any home or period of styling. Each piece is elegantly decorated. Both patterns have an assortment of pieces usually found only in the most expensive selections of dinnerware. They will be avail-

able in open stock by mail order for three years after the special promotion ends.

Grand Union is able to make this fine china available at the lowest possible prices, according to Ralph D. Lytle, Vice President & General Manager in charge of the company's Empire Division, because of the large quantity purchased, direct factory-to-store shipment and the low margin of profit reflected in the retail price of the dinnerware.

Five items of china will be offered, one each week, in repeated cycles of five weeks. A 10-1/4 inch dinner plate will be offered the first week. Following, in succession, will be a bread and butter plate, a cup, a saucer, and a fruit/dessert dish. Each piece will sell for 29¢ with a five dollar purchase.

Each additional \$5.00 expended will entitle the customer to purchase another piece of the dinnerware.

A basic 40-piece service for 8 will cost only \$11.60 when bought according to the promotional plan. Completer pieces, which do not require a minimum purchase, may be added as desired.

Prices of the 16 completer pieces range from \$1.99 to \$5.99. These include soup and salad

plates, meat platters in three different sizes, a casserole, a sugar and creamer, vegetable bowl and coffee pot.

Translucent china such as that being offered by Grand Union is made of the highest quality refined clays. Some of the clays are still found only in the orient where such china originated in the 9th century. Four types of clay are blended with selected minerals and then fired at extremely high temperatures to produce the only china that is translucent and which resounds with a chime-like ring when tapped lightly.

Each piece of dinnerware which Grand Union will market takes nearly eight days of highly-skilled craftsmanship and processing to be completely finished and ready for use.

Mr. Poulos said that the success of the company's earlier promotion of imported translucent china in the metropolitan area, in 1967, resulted in this second offering. He noted that this time the patterns are different, the shapes of the pieces newly-designed and that 16, instead of 14, completer pieces are being offered in addition to a basic 5-piece place setting.

Staffing recommendations for the 1961-62 school budget were also discussed at last week's public board meeting, but all the reports were not heard.

Budget proposals on school district transportation and plant operation and maintenance will also be explained at this hearing, by Mr. Wilson Hermance, director of facilities.

Travelogue Program

The last in the winter series of Travelogue Programs will be held in the Selkirk Fire House #1 on Maple Ave. on Friday, March 5, at 8 P.M.

Mrs. George Porter from Delmar will show and narrate colored pictures on Switzerland and the Alps.

SAT Reminders - Juniors: Mar. 17 is the deadline date for applications for the April 17 SAT testing and March 26 is the deadline date for the May 1 Achieve-

ment Test; both of which will be held at Bethlehem Central. Applications are available in the Guidance Office.

Juniors: Application Procedure for Admission to Military Academies: If a young man wants to prepare himself to enter the service as a commissioned officer through the more traditional route and not via the Reserve Officers Training Corps, he should apply to one of the military academies, administered directly by the United States Government.

The United States Military Academy (Army) is located at West Point, New York; the Naval Academy at Annapolis, Maryland; the Coast Guard Academy at New London, Connecticut; and the Air Force Academy at Colorado Springs, Colorado.

The procedure for admission to the Coast Guard Academy is similar to that for other colleges: Apply directly to the Academy and take the December College Boards.

For the other three academies, you must first apply to your

Senator and/or Representative for an appointment to the Academy of your choice, preferably in the spring of your junior year.

If you receive a congressional appointment to one of the Academies, you must then fulfill the entrance requirements of that particular Academy.

Of course, all four academies offer a virtually free education to successful candidates, but in turn, you are obligated upon graduation to accept a commission as an officer in that branch of the military.

Engineers to be in Demand: Geoffrey H. Moore, Commissioner of Labor Statistics, said "Young People should not shy away from engineering and scientific careers because of the current drop in opportunities. Engineering and science have been among the fastest growing occupational fields in recent years and our projections show that requirements for engineers and scientists will continue to increase rapidly during the 1970's.

Juniors: A brief reminder that tonight at 8 p.m. there will be an open meeting sponsored by the guidance department for your parents and you. Some topics reviewed will be financial aid, college choice, etc.

ARE WE OUT OF A SPECIAL?

Our policy is to plan, order and stock carefully so that you should never have to ask - "Are you out of the special?"

But even our best planning occasionally goes awry - your demand is greater than we expected; the delivery system breaks down or something else happens. Those are our problems, not yours.

For many years, we at Grand Union have had a policy on advertised specials called a RAINCHECK POLICY, to cover the few times we are out of an advertised special. This is the policy that applies in every Grand Union store.

Whenever any of our stores is out of an advertised special for any reason, you are entitled to a RAINCHECK. This means that the customer service desk located at the manager's office will give you a slip (raincheck) entitling you to buy the product at its special price the next time you are in the store.

Our RAINCHECK POLICY is just one of the many policies established for your shopping satisfaction. We would appreciate hearing from you if this policy is not carried out at any of our stores.

Mr. Hawthorne has arranged that all royalties from the Gurney Seed and Nursery Company of Yankton for sales of seed of the Kazakh melon will be paid directly to the college. The first check for \$100 has already been delivered to the college and additional sums will be paid in proportion to the volume of seeds sold. Mr. Hawthorne says that developing this melon has been a hobby and pure fun, and he wants it to remain that way.

He has offered free samples of seed for this melon, together with suggestions for planting to anyone who will send him a stamped, self addressed envelope.

Although he claims to be gradually getting out of the free seed business, he still has a supply of seed and says the offer is still open.

Open Letter

To the Bethlehem Coffee House:

On Wednesday evening, February 24th, I had the good fortune to be exposed to the music and wit of Don McLean. Since this artist's visit to Delmar was

sponsored and hosted by those of you connected with the Coffee House, I would like to share with you a few of my impressions.

For approximately three hours, the young folk singer and writer delivered his material. His presentation was beautiful in its simplicity. His voice was true and resonant, and has a range, I would guess, of at least two octaves. As he sang, sometimes playing a guitar, sometimes a banjo, his delivery ranged from almost whispered syllables to those of explosive intensity. For the entire performance, the audience of more than three hundred people, young and not so-young, sat in rapt attention.

That which impressed me most of all, perhaps even more than the original song dedicated to Vincent Van Gogh, was the attitude and the demeanor of those present. Here, one could easily sense a hope in our youth. Hats off to all who make such ventures possible.

Money Needed!

The 1971 fund campaign of the Leukemia Society begins this week in Albany, Schenectady, and Rensselaer Counties. A goal of \$60,000 has been set for the month-long campaign.

Funds raised in the campaign

support the Leukemia Society's nationwide program of research. Also, financial aid is being provided to the families of leukemia patients in northeastern New York State.

Leukemia is a disease of the blood and blood-forming organs. It is second only to accidents as a cause of death among American children, and a chronic form of the disease strikes adults. In this urea alone, some 20 children succumbed to leukemia last year.

Recent research points to viruses as having a possible relationship to leukemia. Leukemia Society scientists are pursuing this lead in the hope it will ultimately yield a vaccine to prevent all or some forms of leukemia.

Frederick J. Bond, Director of Marketing for Blue Cross and Blue Shield in Albany, is general chairman of this year's leukemia drive.

Division chairmen for the 1971 campaign are: commerce and industry — Raymond J. Kinley, Albany, Harold Van de Car, Schenectady, James Patrick, Troy; advance gifts — Roy A. Klages, Ph.D., Albany; clubs — Edward C. Vandenberg, Albany; advertising, David A. DePorte, Slingerlands; architects — Ronald R. Rucinski, Loudonville; lawyers — John W. Tabner, Albany.

TWO BCHS OUTSTANDING WRESTLERS and their coach: Grant Odhner and Tom Tomlinson. The team finished the regular season with a 4-8 record and a third place finish in the Albany Academy Christmas Tournament. Outstanding were: Jim Appleton (11-2), Tom Tomlinson (12-1), and Co-Captain Grant Odhner (11-3). Other boys on the team include: Seniors Sprague Winship, Terry Moore, Co-captain Mike Mauro; Juniors John McLean, Dave Price, Jim O'Connell, Kit Guntner; Sophs Mike Cohn, Mike Baxter; Freshman Shawn Fitzgerald.

Also, physicians - Robert Randles, M.D., Albany; dentists - Nathan Feltman, D.D.S., Albany; accountants - John F. O'Connor, Albany; residential - Vivienne Anderson, Ph.D., Albany; state employees - Alvin P. Lierheimer, Ph.D., Albany.

The campaign treasurer is Alexander J. Capasso of the National Commercial Bank and Trust Co., Albany. Mrs. Stanley Kelley, Ballston Lake, is president of the area chapter of the Leukemia Society.

Answers about..... BETHLEHEM CENTRAL Schools

By Ann Treadway
Director of Public Information
Bethlehem Central Schools

(Heard any good rumors lately? Do you care about whether they're true or not? Here's the place to find out. This column is a continuing effort to improve communications between school district residents and school district officials. Now that next year's school budget is being formulated, it is particularly important that correct information be made available to everyone.)

So instead of just listening to some of the stories and rumors about school matters that may be going around - write or call Mrs. Treadway and she will find out the facts. If your question is used here, you may be providing a significant service to the whole community. Call 439-4921 any weekday morning.)

QUESTION: Can you give me an estimate of the percentage of the senior class that is in Advanced Placement programs?

J.S.

ANSWER: There are presently 44 Bethlehem Central seniors, of the 403 total number of seniors, who have signed up to take at least one Advanced Placement test this May in History, Math, English, Chemistry, or French.

PASTOR HONORED - At a recent Ladies' Night dinner meeting of the Delmar Kiwanis Club, the Kiwanis Citizenship Award was presented to the Rev. Bethlehem Central offers advanced courses in these subjects. Pupils enrolled in the classes decide whether or not they wish to take the tests.

The test scores are evaluated by the colleges, which determine if the pupils should be given college credit for those subjects on the basis of their test scores.

Advanced Placement courses and testing have been available to Bethlehem Central seniors since 1960.

QUESTION: Why does the Board of Education want to change elementary school boundary lines next year, so that some kids will have to change schools? It seems like a real hardship on the families involved.

R.T.

ANSWER: The proposal to transfer a total of 89 children to other district schools, which was presented and discussed at a public board meeting last week, came from a committee of elementary school principles and teachers appointed by Superintendent Delmer Everett last fall to study district-wide use of facilities.

Reasons behind the proposal are: 1) It provides for more efficient use of all district elementary schools and for equalizing class sizes; and 2) It reduces elementary staff needs by five teachers.

(This does not mean that five teachers will be fired; the reduction, if the proposal is adopted, will come about naturally through non-replacement of teachers who are resigning.)

The Board of Education looks favorably upon the proposal mainly because of the savings it will make possible to district taxpayers. Board members recognize that there may be some inconvenience incurred and adjustments necessary by the families involved. But the board also has stated that there is no significant difference in program and personnel among all district elementary schools, and it is hoped that — should the proposal be officially adopted as part of next year's budget — affected families will be unselfish enough to recognize the overall advantages:

the 1970 regular big game season, 659 bears were killed, according to Al Hall, Director of the Division of Fish and Wildlife, Department of Environmental Conservation. Another 66 bears were taken during a special Adirondack season held in early October before the regular season began. The total take of 725 bears eclipses the record of 716 set just a year earlier, and greatly exceeds the 10-year average of 527, Hall said.

The Adirondack Region, which comprises three-quarters of New York's bear range, accounted for 612 bears (a record for the regular season), while 40 were taken in the Catskills and another seven in the western region of the State. Factors that influence the kill for any given year are several, including availability of food, time of denning, hunting pressure and characteristics of the bear population itself.

Most bears were taken in the Adirondack counties of Hamilton (202), Essex (97), St. Lawrence (81) and Herkimer (72). Individual county records were

set in Hamilton, Saratoga and Oneida Counties. In the Catskills, Ulster County produced the most bears this year (14), followed by Sullivan (12) and Greene (10) Counties. The Central and Western Region, representing only a small fraction of the State's bear range, produced a harvest below that of previous years.

In 1970, a new reporting procedure required successful hunters to phone a toll-free number within 48 hours to report their bear kill. The purpose of this system was two-fold. First, the Department of Environmental Conservation was thus able to

Only Sony Color TV... Better Color was just a promise.

Sony simplified its TV system and got better color. They call it Trinitron.[®] Sony invented its color TV as it was meant to be: all colors are shot through one big color gun.

The Trinitron[®] system has a bigger lens, too. Twice as large as other TV's. With the larger lens you get a sharper, brighter picture.

There are many other features too:

Automatic color control; integrated contrast-color control; pictures stay crisp and brilliant at all points on the screen; all solid state circuitry for greater reliability; contemporary wood cabinet styling.

Come in and watch the Trinitron System with 12" diagonal screen deliver a sharper, brighter, and a better color picture.

SONY.

Stop waiting for better Color TV. It's here!

contact the successful hunters earlier than previously had been possible, so that a lower jaw could be collected before the entire carcass was discarded. From these lower jaw, a tooth is extracted and used to age each bear using a method developed by the Department's wildlife biologists. This technique consists of making a micro-section of the tooth that then reveals the number of annual layers that correspond to the bear's age. More than 200 jaws were collected from the 1970 harvest, far more than the Department has ever processed before. Information derived from these collections is used to study population characteristics of black bears so that better management methods may be applied.

The second purpose for the telephone reporting system was to enable early and direct contact with all successful Catskill hunters. An intensive research study began in 1970 to determine the present status of the Catskill bear population, which appears to be declining. Information obtained from hunters is an important aspect of the research, which also involves trapping and marking bears during summer and fall. All hunters contacted had their bears examined for biological data, weighed, sexed

and aged by the tooth-sectioning technique.

Three Catskill bears, ear-tagged during the previous summer, were reported and checked. These animals provided important information on growth and local movements, and earned a \$25 reward for each hunter. Another hunter-killed bear turned out to be one tagged by Pennsylvania researchers last July. Since 1956, more than 350 bears have been captured, tagged and released, most of these in the Adirondacks.

Bow and arrow hunters killed three bears this year. One each came from the Towns of Inlet and Long Lake in Hamilton County, and the third from Stony Creek in Warren County.

Announcing the end of the conventional station wagon.

Up 'til now station wagons have been pretty much the same. But the end is in sight. Because Audi has developed a station wagon that's every bit as different as the Audi sedan.

It's called the Audi Wagon. And it has front wheel drive, for better tracking and easier handling. Power inboard front disc brakes, located in the car's airstream to help keep them cooler. Rack-and-pinion steering, like on famous racing cars, so the driver has more feel for the road. An engine that'll accelerate from 0-60 in 12 seconds, yet give you an economical 26 mpg.

And the Audi Wagon is only 172.4 inches long (which makes it very easy to park), yet has 33.5 cu. ft. of storage space in the back. And 56.5 cu. ft. when the back seat is down. And to help you get things into the back storage space easily, there's a top-hinged loading gate.

So you see, the Audi Wagon isn't like conventional station wagons. But then what did you expect from a car company that doesn't make conventional cars?

Come see and test drive the Audi Wagon yourself.
